

## **Carolyn Raffensperger MA, JD**

Carolyn is the Science and Environmental Health Network's (SEHN) founding Executive Director. In 1982 she left a career as an archaeologist in the desert Southwest to join the environmental movement. She first worked for the Sierra Club where she addressed an array of environmental issues including: forest management, river protection, pesticide pollutants, and disposal of radioactive waste. She began working for SEHN in December 1994. As an environmental lawyer she specializes in the fundamental changes in law and policy necessary for the protection and restoration of public health and the environment.

Carolyn is co-editor of "Protecting Public Health and the Environment: Implementing the Precautionary Principle," published by Island Press (1999). This volume is the most comprehensive exploration to date of the history, theory, and implementation of the precautionary principle. She writes the Science for Lawyers column for the Environmental Law Institute's journal Environmental Forum. In addition, she serves on editorial review boards for several environmental and sustainable agriculture journals, and has served on USEPA and National Research Council committees.

Carolyn has been featured in *Gourmet* magazine, the *Utne Reader*, *Yes! Magazine*, the *Sun*, *Whole Earth*, and *Scientific American*. Along with leading workshops and giving frequent lectures on the Precautionary Principle, Carolyn is currently involved in getting the Ecological Medicine Program up and running at SEHN, as well as in revisioning the judicial system via the program on Science in the Courts.

## **Ted Schettler, MD, MPH**

Ted Schettler has a medical degree from Case-Western Reserve University and a Masters degree in public health from the Harvard School of Public Health. He is science director for the Science and Environmental Health Network and co-chair of the Human Health and Environment Project of Greater Boston Physicians for Social Responsibility.

Dr. Schettler is co-author of "Generations at Risk: Reproductive Health and the Environment," which examines reproductive and developmental health effects of exposure to a variety of environmental toxicants. He is also co-author of "In Harm's Way: Toxic Threats to Child Development," which discusses the impact of environmental exposures on neurological development in children.

He is a member of the Environment Committee of Physicians for Social Responsibility, the committee on Occupational and Environmental Health of the Massachusetts Medical Society. Dr. Schettler is on the medical staff of Boston Medical Center and has a clinical practice at the E. Boston Neighborhood Health Center.
