“GM products that are currently on the international market have all passed pre-market safety assessments conducted by national authorities.” – Government of Canada (para 6)

Government risk assessments do not ensure safety.

gmoinquiry.ca/regulation

“Internationally, scientists have concluded that GM crops pose no more risk to human health than non-GM crops.” – Government of Canada (para 6)

There is no scientific consensus that GM foods are safe.

(Hilbeck et al. *Environmental Sciences Europe*. 2015. 27:4)

*“Canada considers that Mexico has not considered the long history of safe use of GM corn when adopting its measures.”-
Government of Canada (para 60)*

**There is no long history of safe use of
GM corn in the Mexican diet.**
